

PalletizUR

ONExia Inc.

Designed for Universal Robots line of collaborative robots, the PalletizUR is a turn-key palletizing system that requires no hard guarding or programming to operate.

Using the UR OEM collaborative robots, the PalletizUR does not have a teach pendant and is controlled through a single touchscreen interface. Preloaded with the ONExia Robotics Palletizing Software, end-users can create, edit, and save pallet configurations without writing a line of code.

Featuring a third party verified collaborative design, manufacturers of all sizes can confidently deploy a safe, cobot palletizer that can be easily adjusted to future production demand. Contact ONExia today to learn more.

Features:

- Minimal footprint - no caging or guarding needed
- Quick deployment - requires a standard outlet and air line
- Durable & portable - easily moved with a pallet jack or forklift
- Custom end-effectors - lightweight custom designs specific to each application
- Palletizing software - drag and drop pallet building through a touchscreen interface
- Continuous operation - 2 pallet reach capability
- Auto-height adjustment - collaborative rated lifter for high pallet stacks

Specifications:

■ Software version required

Polyscope
ONExia Palletizing Software

■ Dependencies

110v 15amp power outlet
Air line - 85psi (+/- 2.5cfm)

■ Dimensions

Every PalletizUR is shipped with all the necessary end-effectors, nesting conveyors, and safety scanners needed.

Dimension: L: 67.2" W: 119" H: 9' of overhead clearance required

Unfolded:

- 105 x 390 x 390 mm
- 4.13 x 15.35 x 15.35 inch

■ License type

One-time purchase
